

Shayaan Rashedin

Mississauga, ON | 647-877-1449 | shayaan.rashedin@torontomu.ca
linkedin.com/in/shayaanrashedin | github.com/shayaanrashedin | Portfolio: shayaanrashedin.github.io

Skills

Technical Skills: C, C++20, Python, Bash, Linux, POSIX sockets, TCP/IP, Multithreading, SQL, Git/GitHub, CMake, Docker, systemd, Troubleshooting.

Education

Bachelor of Engineering - Computer Engineering

September, 2023 - Exp. April, 2027

Toronto Metropolitan University, Toronto, ON

- Relevant Coursework: Operating Systems, Computer Organization and Architecture, Software Systems, Communication Systems.

Certifications/Training

Google IT Support Professional Certificate

Completed February 2025

- Completed training in Linux/Windows administration, TCP/IP networking, DNS, DHCP, NAT, and troubleshooting.

Google Cybersecurity Professional Certificate

Completed June 2025

- Completed training in threat analysis, vulnerability management, SIEM detection, Linux security, and incident response.

Projects

SyncWire | C++20 TCP File Transfer and Synchronization

Personal project | github.com/ShayaanRashedin/syncwire

- Built a Linux client-server application in C++20 with a versioned binary protocol, incremental TCP frame parsing, and partial socket I/O handling.
- Implemented an epoll-based accept loop, bounded connection queue, and std::jthread worker pool with coordinated shutdown and session counters.
- Added resumable file uploads and incremental directory synchronization with CRC-32 validation, fsync, and atomic file replacement.

NetWatch | C++20 Linux Network Observability

Personal project | github.com/ShayaanRashedin/netwatch

- Built a C++20 Linux agent that parses procfs TCP/UDP socket data across IPv4/IPv6 and correlates socket inodes with owning processes.
- Separated collection from SQLite persistence using a bounded thread-safe queue, a background writer, and transactional event storage.
- Added deterministic unit tests and GitHub Actions builds, with CMake/CPack packaging, systemd services, and Docker deployment configuration.

Experience

VP of Education - TorontoMet Cybersecurity Association, Toronto, ON

October 2025 - Present

- Plan and lead cybersecurity workshops and CTF sessions for TMU students covering Linux administration, networking, and security fundamentals.
- Develop instructional materials and guide students through hands-on troubleshooting, while coordinating session logistics.
