EDUCATION

Toronto Metropolitan University | Toronto, ON
Bachelor of Engineering, Computer Engineering | Expected Apr 2027
Relevant coursework: Operating Systems; Computer Networks; Embedded Systems Design

TECHNICAL SKILLS

Programming: C++, C, Python, HCS12 Assembly, Bash, SQL, JavaScript
Systems & Hardware: Linux, POSIX, TCP/IP, multithreading, GPIO, ADC, interrupts, state machines
Tools & Platforms: CMake, CTest, GitHub Actions, Docker, SQLite, Splunk, Wireshark, Nmap

PROJECTS

SyncWire

C++20 | Linux / POSIX | TCP | OpenSSL | Code & documentation

- Built a C++20 client-server application for resumable uploads and incremental directory synchronization, transferring only missing or changed files while preserving server-only files.
- Implemented CRC-verified recovery and atomic file replacement; added real-TCP acceptance checks for forced restarts, reconnects, and unchanged-file skipping, with SHA-256 output verification.

NetWatch

C++20 | Linux procfs | SQLite | REST API | Code & documentation

- Built a Linux monitoring agent that links IPv4/IPv6 TCP and UDP sockets to processes, users, and executables; tracked PID and start time to distinguish reused process IDs.
- Exposed six explainable detection rules through a REST/JSON API and JavaScript dashboard; added Catch2/CTest coverage and Docker, systemd, and GitHub Actions delivery workflows.

EEBOT Robot Guidance

HCS12 Assembly | MC9S12C32 | Three-person course project | Code & documentation

- Developed and integrated HCS12 assembly firmware across sensing, navigation, and hardware control in a three-person team, using five infrared channels, ADC, GPIO, bumpers, and a 20x2 LCD.
- Implemented finite-state navigation with calibrated tape following, dead-end recovery, and fixed storage for 32 route decisions to support backtracking and return traversal.

Security & Automation Lab

Python | Splunk | Linux | Detection engineering | Lab documentation

- Built a Python log-analysis tool with four detection rules and SQLite evidence storage; configured an isolated Linux lab for vulnerability assessment and Splunk brute-force alert validation.

CERTIFICATIONS

Google Cybersecurity Professional Certificate | Jun 2025
Google IT Support Professional Certificate | Feb 2025

EXPERIENCE & LEADERSHIP

Vice President of Education | Toronto Met Cyber Security Association

Toronto, ON | Oct 2025 - Present

- Help organize cybersecurity workshops and networking events drawing 70-100 attendees each; develop hands-on labs and learning materials on Linux, networking, and security.

Youth Engineering Instructor | Toronto High Park Young Engineers

Toronto, ON | Sep 2024 - Sep 2026

- Taught LEGO-based engineering and programming concepts to groups of 20+ students; guided hands-on builds covering transmissions, gear ratios, and problem-solving.
